

HS Chemistry Supplies

I forgot to mention in the course catalog that your student will need a scientific calculator. I recommend something similar to the TI-30XA which can be purchased at Walmart for under \$15.00.

Also each student needs a 3-ring binder with notebook paper. I do not want them doing lab reports and homework in a spiral bound notebook. Student will need to turn things in for grading and the uneven edges on spiral bound notebook pages are a pain.

I am looking forward to teaching your student this fall.

Thanks
Chris
